

3 4 0 0 A T M

Shown with optional High Topper

# 3 4 0 0 A T M

The first thing you'll notice about the model 3400 is the vibrant 10.4" color display. With four times the resolution of any dial-up cash dispensing mechanism in the market, this spectacular display is only one of the added value features of Tidel's newest, most innovative ATM.

The 3400 comes standard with the Tidel Cash Dispensing Mechanism (TCDM) which offers field expandability from 1 to 4 cassettes at a significantly reduced cost. With the addition of services such as CashWorks check cashing, PaySpot prepaid wireless and Z-Cash wire transfer, the need has never been greater to have the scalability to upgrade your cash dispenser capacity.

Tidel's new industry-leading 18-month parts warranty speaks volumes about the rugged reliability of its 3000 Series ATMs.

Additional features such as constant monitoring and logging of vault access, Tamper Resistant Encrypted Pin Pads (TREPP) and Triple DES compliance make the 3400 a leader in ATM security. The 3400 also complies with all existing and currently proposed Americans with Disabilities Act (ADA) regulations, and includes standard hardware for private audio transactions.
